

How to make calls, check emails and access your favourite apps using the SatSleeve

A. MAKE AND RECEIVE CALLS IN SATELLITE MODE

Pair your SatSleeve with the smartphone via Wi-Fi:

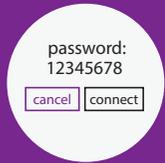

**1st
STEP**

Go to your smartphone settings – 'Wi-Fi' and switch Wi-Fi 'on'

**2nd
STEP**

Turn on your SatSleeve.

**3rd
STEP**

Select the SatSleeve from the smartphone Wi-Fi list. The default password is 12345678.

**4th
STEP**

Open the free SatSleeve Hotspot App

You are now ready to make and receive calls in satellite mode.

B. INITIATE A SATELLITE DATA CONNECTION

Once your SatSleeve is paired using Wi-Fi, turn on Satellite Data.

**1st
STEP**

Satellite data through your SatSleeve needs to be activated. To enable data on your SatSleeve call us on 1300 882 448.

**2nd
STEP**

In the SatSleeve Hotspot App, go to 'More', select 'GmPRS APN', change to 'pivinternet' and 'Done'. Then select 'Satellite Data', enter your device MAC address and turn on Satellite Data.

**3rd
STEP**

Satellite data connection is now ON. Please ensure to turn it off when you do not require satellite data.

You can now use your preferred browser, check emails, or use apps such as WhatsApp, Facebook, Twitter, LinkedIn and more, via the satellite connection.
